

Mohamed Qatish

Software Engineer | Full Stack Web Developer | Technical Content Creator

 mohammed764555@gmail.com | +963992576455 |  <https://github.com/MohamedQatish>
 https://www.youtube.com/@mohamed._.qatish |  <https://t.me/MohamedQatish>

Software Engineer holding a Bachelor's degree in Information Technology Engineering (Software Engineering) from Damascus University, with 3+ years of professional experience building scalable backend architectures and full-stack solutions. Proven expertise in PHP (Laravel, CodeIgniter), TypeScript (Next.js, NestJS), and advanced relational database design (MySQL) featuring secure role-based access control. Successfully deployed enterprise-level production systems, including high-traffic e-commerce platforms, and managed end-to-end DevOps cycles (cPanel, DNS, Server Configuration). Recognized technical content creator who has mentored 5,000+ developers through advanced API development courses, demonstrating a solid commitment to clean code architecture and software engineering best practices.

SKILLS

- **Programming Languages:** PHP, JavaScript, TypeScript, C++, Java
- **Back End:** Laravel (experienced in API development And Blade) | CodeIgniter | Design Patterns | NestJS (intermediate) | Service Layer Architecture
- **Front End:** Next.js, React, TypeScript, HTML, CSS, Bootstrap, JavaScript, Responsive Design, RTL Layouts
- **Databases and ORMs:** MySQL, Eloquent ORM, Query Optimization, Indexing
- **Additional Skills :** RESTful API Design, Problem Solving, STL, Clean Code, Three.js
- **Tools & Software:** Git, GitHub, Postman, ThunderClient, cPanel, Composer, NPM
- **Deployment & DevOps:** Production Deployment | Domain & DNS Configuration | Server Configuration
cPanel Management | Environment Setup | Git Workflows
- **Content Creation:** Teaching, course development, video production (Premiere, Canva)

PROJECTS

02/2026

Baklava E-Commerce Website – Next.js (Full-Stack Developer) | 2026

A fully functional e-commerce website developed and deployed in production environment.
Complete project lifecycle from development to deployment and launch.

Key Achievements:

- Full website development using Next.js
- Database design and implementation
- Server deployment and production environment setup
- Domain configuration (alemelbklawa.ly) and DNS management
- Performance optimization and security hardening

★ **Live Website:** <https://alemelbklawa.ly>

📰 Banks & Insurance Magazine – Next.js (Full-Stack Developer) | 2026

06/2026

A professional economic and financial news platform built with Next.js, specializing in banking, insurance, and financial news coverage.

Key Achievements:

- Built a complete news platform with Markdown-based CMS for easy content management
- Implemented RTL (Right-to-Left) support with full Arabic language integration
- Designed responsive UI with Dark/Light mode, news ticker, and ad carousel
- Developed dynamic news filtering, search, and category-based browsing
- Achieved 90+ Lighthouse scores with performance optimization (Turbopack)
- Deployed on Vercel with automatic CI/CD via GitHub integration

🚀 **Live Website:** <https://banks-insurance.vercel.app>

Jobs & Freelancing Portal – Laravel (Back-End Developer)

06/2024

Built the complete backend of a jobs and freelancing platform using Laravel.

Key Features:

- Authentication & authorization, user profiles
- Job posting, applications, contracts, ratings
- Wallet system, skills management
- Search & filtering, saving jobs, favorites
- Advanced Eloquent features: polymorphic relations, morphable models

Clean architecture, optimized database queries

Pharmacy-Warehouse Management System (Back-End Developer, Laravel)

05/2023

Backend system connecting drug warehouses with pharmacists. Includes inventory tracking, orders, authentication, and full CRUD modules with clean code and scalable structure.

08/2025

Academy Management System – Laravel (Large Scale Project)

A full educational institute management system for admins, teachers, students, and parents.

Core Features:

- Complete user roles: Admin, Teacher, Student, Parent

- Weekly schedules, classrooms, subjects, class types
 - Attendance management
 - Exams, exam terms, grades
 - Homework & quizzes for teachers and students
 - Parent dashboard with full tracking
 - Authentication with Laravel Sanctum
 - Clean architecture: MVC + Service Layer
 - Scalability, high performance, secure role-based access
- ✦ Repository: <https://github.com/NoorAlden21/arabian-group-academy>

Advanced Laravel API Course – Technical Content Creation

Created a complete advanced Laravel API course covering:

- Rate limiting
- Localization
- Multi-device authentication using Sanctum
- Service layer architecture
- Advanced Eloquent & design patterns
- API security

This course demonstrates expert-level backend knowledge and technical teaching ability.

✦ Course : <https://mohamedqatish.gumroad.com/l/advanced-laravel-12-course>

Complaint Management System – NestJS

Developed a backend system that allows citizens to submit complaints, upload supporting files, and track their status. Built secure and scalable APIs for both a mobile application and a web dashboard used by government employees. Implemented OTP authentication, role-based access control, detailed audit logs, and strict concurrency control to prevent conflicting updates. Focused on clean architecture, strong security measures, performance optimization, and maintaining a transparent and reliable complaint workflow across all system components.

Experience

02/2026

Full-Stack Developer – AFAQ Company | Libya (Remote)

February 2026 – Present

- Developing modern web applications using Next.js and TypeScript
- Building reusable components and integrating with REST APIs
- Collaborating in remote development team using Git
- Contributing to production systems with focus on performance
- Implementing responsive designs and modern UI/UX

05/2025

Full-Stack Developer – Osus Company | Remote (Turkey)

Responsibilities:

- Built and deployed full-stack applications using Laravel & CodeIgniter
- Designed scalable database architectures and implemented APIs
- Built responsive front-end interfaces using HTML, CSS, JS
- Managed deployments: server configuration, domains, cPanel
- Provided ongoing support for production systems
- Delivered beginner-friendly programming training (PHP, web basics)

04/2023

Technical Content Creator – YouTube Channel (@mohamed._.qatish)

- Produced full educational courses covering:
 - Laravel API (basic to advanced)
 - C++ STL
 - Competitive programming (Codeforces)
- Developed advanced Laravel lessons (Rate Limiting, Localization, Sanctum token management, Architecture)
- Used professional video production tools (Premiere, Canva)

EDUCATION

Bachelor of Science in Information Technology Engineering (Software Engineering)

Damascus University | Damascus, Syria

Graduation Year: 2026

Language

Arabic (Native)

English (Professional working proficiency)
