Mohamed Qatish

Software Engineer | Full Stack Web Developer | Technical Content Creator

mohammed764555@gmail.com | +963992576455 | https://github.com/MohamedQatish
https://www.youtube.com/@mohamed._.qatish | https://t.me/MohamedQatish

Software Engineer with 3+ years of experience designing and building scalable back-end systems using Laravel, CodeIgniter, and modern PHP,Next.js . Proven expertise in developing robust RESTful APIs, implementing advanced architectural patterns (service layer, repository pattern), and designing complex relational databases with role-based access control.Successfully delivered multiple production applications and mentored 5000+ developers through technical training and advanced Laravel courses. Currently expanding technical stack with NestJS, developing a medium-scale project from inception. Additionally, independently built a large-scale Next.js application, implementing full-stack features, modern UI/UX, and complex front-end architectures while applying clean code principles and best practices.

SKILLS

- **Programming Languages:** PHP, JavaScript, TypeScript, C++, Java
- **Back End:** Laravel (experienced in API development And Blade)| Codeigniter |Design Patterns | NestJS (intermediate) |Service Layer Architecture
- **Front End:** Next.js , HTML, CSS, Bootstrap, JavaScript, Responsive Design
- **Databases and ORMs:** MySQL, Eloquent ORM, Query Optimization, Indexing
- **Additional Skills :** RESTful API Design, Problem Solving, STL, Clean Code, Three.js
- **Tools & Software:** Git, GitHub, Postman, ThunderClient, cPanel, Composer, NPM
- **Deployment & DevOps**: Production Deployment | Domain & DNS Configuration | Server Configuration cPanel Management | Environment Setup | Git Workflows
- **Content Creation:** Teaching, course development, video production (Premiere, Canva)

PROJECTS

02/2026

🌐 Baklava E-Commerce Website – Next.js (Full-Stack Developer) | 2026

A fully functional e-commerce website developed and deployed in production environment.
Complete project lifecycle from development to deployment and launch.

Key Achievements:
• Full website development using Next.js
• Database design and implementation
• Server deployment and production environment setup
• Domain configuration (alemelbklawa.ly) and DNS management
• Performance optimization and security hardening

📌 **Live Website: https://alemelbklawa.ly**

Jobs & Freelancing Portal – Laravel (Back-End Developer)

06/2024

Built the complete backend of a jobs and freelancing platform using Laravel.
Key Features:

- Authentication & authorization, user profiles
- Job posting, applications, contracts, ratings
- Wallet system, skills management
- Search & filtering, saving jobs, favorites
- Advanced Eloquent features: polymorphic relations, morphable models

Clean architecture, optimized database queries

Pharmacy-Warehouse Management System (Back-End Developer, Laravel)

05/2023

Backend system connecting drug warehouses with pharmacists. Includes inventory tracking, orders, authentication, and full CRUD modules with clean code and scalable structure.

08/2025

Academy Management System – Laravel (Large Scale Project)

A full educational institute management system for admins, teachers, students, and parents.

Core Features:

- Complete user roles: Admin, Teacher, Student, Parent
- Weekly schedules, classrooms, subjects, class types
- Attendance management
- Exams, exam terms, grades
- Homework & quizzes for teachers and students
- Parent dashboard with full tracking
- Authentication with Laravel Sanctum
- Clean architecture: MVC + Service Layer
- Scalability, high performance, secure role-based access
  📌 Repository: https://github.com/NoorAlden21/arabian-group-academy

Advanced Laravel API Course – Technical Content Creation

Created a complete advanced Laravel API course covering:

- Rate limiting
- Localization
- Multi-device authentication using Sanctum
- Service layer architecture
- Advanced Eloquent & design patterns
- API security

  This course demonstrates expert-level backend knowledge and technical teaching ability.

  📌Course : https://mohamedqatish.gumroad.com/l/advanced-laravel-12-course

Complaint Management System – NestJS

Developed a backend system that allows citizens to submit complaints, upload supporting files, and track their status. Built secure and scalable APIs for both a mobile application and a web dashboard used by government employees. Implemented OTP authentication, role-based access control, detailed audit logs, and strict concurrency control to prevent conflicting updates. Focused on clean architecture, strong security measures, performance optimization, and maintaining a transparent and reliable complaint workflow across all system components.

Experience

02/2026

Full-Stack Developer – AFAQ Company | Libya (Remote)

February 2026 – Present

• Developing modern web applications using Next.js and TypeScript

• Building reusable components and integrating with REST APIs

• Collaborating in remote development team using Git

• Contributing to production systems with focus on performance

• Implementing responsive designs and modern UI/UX

05/2025

Full-Stack Developer – Osus Company | Remote (Turkey)

Responsibilities:

- Built and deployed full-stack applications using Laravel & CodeIgniter
- Designed scalable database architectures and implemented APIs
- Built responsive front-end interfaces using HTML, CSS, JS
- Managed deployments: server configuration, domains, cPanel
- Provided ongoing support for production systems
- Delivered beginner-friendly programming training (PHP, web basics)

04/2023

Technical Content Creator – YouTube Channel (@mohamed._.qatish)

- Produced full educational courses covering:
  - Laravel API (basic to advanced)
  - C++ STL
  - Competitive programming (Codeforces)
- Developed advanced Laravel lessons (Rate Limiting, Localization, Sanctum token management, Architecture)
- Used professional video production tools (Premiere, Canva)

EDUCATION

Damascus university /ITE (information technology engineer) 2021 – 2026 | Damacus, Syria

ITE 5th Year | SE

language

Arabic (Native)

English (Professional working proficiency)
